

WARNING

As your fire may turn on remotely at any time, it is imperative that items are never placed in close proximity to or in front of the fire. Escea Ltd will accept no liability for injury to persons or damage to property due to the consequences of items being placed in close proximity to the fire.

How it works

Any number of different escea fires are all connected to the same phone number. When you dial the number to activate your i-con phone switch your serial number and PIN are sent all those fires but only yours will accept the number and switch on or off.

Your remote controller communicates with your fire every four minutes. So when you use the i-con phone switch there can be a delay of up to four minutes from when your fire receives the signal to when it reacts.

www.escea.co.nz/icon/login.php

i.con online gives you greater control than simply turning your fire on or off. With i.con online you can set, enable and disable your timers. You can also set future one off "turn on" events to coincide with your arrival home from a holiday or a night out. Simply follow the link above to register and login to i.con online.

Telephone And Internet
Activated Fire Switch.

Exclusively For Escea Gas Fires.

Operation

Please read these instruction completely before attempting use the i-con phone switch.

SERIAL

PIN

G8869

You can use your i-con phone switch to turn your
 escape gas fire on or off by either manually dialing
 or by setting up a single speed dial number on
 any programmable or cellular telephone.

Manual Dialing

Dial **"026 243 2820"** to access the Telecom
 network.

Once the call is picked up wait for a series of
 quick beeps.....

Now, key in your fires serial number followed by
 your three digit pin which is shown below.

SERIAL	PIN
--------	-----

Now enter either.....

"0" to turn your fire **Off**,
 or
"1" to turn your fire **On**.

Now press the **#** key to finish the message
 to the fire. You can now hang up.

SERIAL XXXX-XXX-X# ON or OFF	DIAL 026 243 2820
------------------------------------	----------------------

ENTER AFTER THE TONE

Speed Dialing

Consult your telephones user manual for information
 regarding programming phone numbers, paying
 particular attention to pauses in the phone dialing
 sequence.

You will need to program two numbers into your
 phone. One to turn your fire on, and the other to
 turn it off. NOTE: These two numbers are identical
 except for the very last Digit.

An 8 second pause is required between dialing the
 phone number and dialing the serial, PIN and on/off
 number.

The number to program for turning your fire **"ON"**....

SERIAL XXXX-XXX-1# ON	DIAL 026 243 2820
-----------------------------	----------------------

8 SECOND PAUSE

The number to program for turning your fire **"OFF"**....

SERIAL XXXX-XXX-0# OFF	DIAL 026 243 2820
------------------------------	----------------------

8 SECOND PAUSE

Note: the **#** at the end of the sequence tells the
 Telecom network that the message has concluded.
